Nuevo en MedicusEHR®

Versión: 411

En esta nueva actualización se encuentran funcionalidades diseñadas para optimizar el manejo de la aplicación.

Esta nueva versión incluye mejoras, correcciones y nuevas funciones que contribuyen a un mejor rendimiento y ejecución de nuestro récord electrónico MedicusEHR®.

A continuación, presentamos lo que encontrará en este nuevo update:

SuperBill “Print Superbill”

Se ha agregado el botón “Print Superbill”, el cual está disponible tanto en la sección “Dashboard / Superbill” como en la nota de progreso. Esta función, permite generar e imprimir el superbill de manera rápida y conveniente desde ambas ubicaciones.

Superbill creado desde Dashboards / Superbills

Conversión de Códigos Loinc a Códigos CPT (OPD / ER)

Se ha implementado un cambio en el área de órdenes. A partir de ahora, la búsqueda deberá realizarse utilizando códigos CPT o la descripción de la orden, en lugar de los códigos o la descripción de LOINC, como se hacía anteriormente.

Este ajuste tiene como objetivo mejorar la precisión y estandarización del proceso.

Debido a esta actualización, los combos previamente creados con códigos LOINC, han sido asociado a CPT en la medida de lo posible. Sin embargo, en algunos casos no se pudo realizar la conversión automáticamente. Para hacer esta transición más sencilla, hemos habilitado una herramienta en la misma pantalla que les permitirá eliminar el combo anterior, crear uno nuevo y buscar la orden correspondiente, en un solo paso.

CPT Codes OPD & ER

Al intentar agregar un combo de órdenes que contenga un código LOINC, aparecerá un mensaje de alerta indicando la necesidad de clonar ese panel y recrearlo utilizando órdenes con códigos CPT. **(Nota: Las órdenes con códigos Loinc, estarán identificadas en color rojo.)**

The screenshot shows the 'Order Creation' window. On the left, a welcome message says 'Welcome to the ORDER module, read me first!' with a document icon. On the right, the 'Order Creation Helper' is active, showing a list of panels. A red arrow points to a '+' icon next to the 'Basic Panel' entry. The 'Basic Panel' entry is highlighted in red and contains the following text: 'Albumin; urine (eg, microalbumin), quantitative (Default Dx: E11.69)', 'CBC W Auto Differential panel - Blood', 'Comprehensive metabolic panel This panel must include...', 'Influenza virus A and B Ag (Identifier) in Nose by Rapid i...', 'Lipid panel This panel must include the following: Chole...', and 'Urinalysis, by dip stick or tablet reagent for bilirubin, glu... (Default Dx: E23.2)'. Below this, there is a section for 'CA-Labs' with several entries for 'Immunosay for tumor antigen, quantitative' with different CA codes.

De manera automática se despliega una notificación de advertencia, donde el usuario deberá seleccionar la opción “Clone” para continuar.

The warning dialog box has a yellow header with the word 'WARNING' and a close button. Below the header, there is a bell icon and the text: 'The panel contains tests that cannot be used due to new CPT constraints. Would you like to clone the panel and reselect the tests that no longer match?'. At the bottom, there are two buttons: 'CLONE' and 'CANCEL'.

Al presionar el botón de “Clone”, se desplegará la sección de “Laboratory Panel Clone Helper”, donde podrá modificar las órdenes convirtiendo los códigos Loinc a CPT. En la sección de “Original Laboratory Panel”, se mostrará el combo original con el nombre que fue creado, y en la sección de “New Laboratory Panel”, aparecerán las órdenes que se pudieron reemplazar automáticamente, solo deberá añadir las que no se hayan cambiado, identificadas en color rojo como se hace mención anteriormente.

ER Order Creation

Al intentar agregar un combo de órdenes que incluya un código LOINC, aparecerá un mensaje de alerta indicando la necesidad de actualizar y reemplazar el panel seleccionado con órdenes que tengan códigos CPT. El usuario puede optar por reemplazar las órdenes con código LOINC por CPT o continuar con la orden omitiendo las que tengan código LOINC, y presionar el botón “Yes”.

(Nota: Las órdenes con códigos Loinc, estarán identificadas en color rojo.)

De manera automática se despliega una notificación de advertencia donde el usuario presionará “Replace Labs”.

Al presionar el botón de “Replace Labs”, se desplegará la sección de “Combo Laboratory Replacement”, donde podrá modificar las órdenes convirtiendo los códigos LOINC a CPT. En la sección de “Original Laboratory”, seleccione la(s) órdenes que desea actualizar y reemplazar. Se habilitará la sección de “Order Editing”.

Dashboards / ER Order Dispatcher

Se agregó botón de “Refresh”, para actualizar el listado del movimiento de órdenes realizadas al paciente.

The screenshot shows the 'ER Order Dispatcher' dashboard. At the top, there's a blue header with 'DASHBOARDS | ER Order Dispatcher' and a '+ ADD NEW WALK IN' button. Below the header, there's a navigation bar with 'Dashboards Home' and 'ER Order Dispatcher'. A filter dropdown is set to 'Pending' and a patient name 'Doe, John' is displayed. On the right, there's a summary section with 'ORDERS' and four colored boxes: 'Post Due' (258, red), 'Pending' (0, yellow), 'Cancelled' (0, grey), and 'Today' (20, blue). Below this, there's a 'Worksheet' button and a 'SET AS HOME PAGE' link. The main table lists orders with columns: Mins to Schedule, Schedule / Last Action, Order Type, Order, Ordering / Attending, Visit ID, Patient, Gen./Age, Chief Complaint / Cat, Status, Next Action, and Order Notes. A red box and arrow highlight a refresh button (circular arrow icon) in the top left of the table area.

Corrección de Errores (Bugs & Fixes)

Diagnósticos - Se corrigió la duplicidad de diagnósticos en sistema al momento de añadir y dar doble click.

ER Addendum - Error al crear una nota de “Addendum,” y luego eliminarla. Esta acción anulaba todas las notas de progreso, incluyendo la nota del “Addendum”.

Bugs & Fixes - Corrección de varios “bugs & fixes” menores, que afectaban la estabilidad de la aplicación.
